PROFESSIONAL EXPERIENCE

Samson Software Solutions Inc. Noida, India

Software Tester: Manual Tester   January 2014- July 2016

Edoors is the software used primarily to fetch resumes routed via various Job Portals, post job requirements for the recruiters to look into it. This web based application has a database of resumes routed from portals such as Monster, Dice, Tech-fetch, Career Builder, Pro-hire, etc. Edoors helps the Sales team post requirements and on the other hand, the recruitment team works on the requirements as per the posting done on Edoors. Fetching of resumes by putting the String as per the requirement is done. This software's dynamic nature helps update all the information on the portal and works out to be very efficient for the Recruitment division.

- Managed all phases of software testing for assigned application ensuring Test plans, Test Strategies and Test cases are completed to meet business requirements.
- Created Test Plan and used it in conjunction with the Test Cases and Test Procedure which ensures the Quality and reduces the risk of failure and used Test Director for repository, reporting bugs, tracking and updates on resolved bugs.
- Expertise in manual testing includes Requirements Analysis, writing Test plans, Test Cases and Requirements Traceability Matrix. And exposure in implementing Agile & Waterfall Methodologies.
- Performed integration and regression testing on Intranet Application

Environment**:** Test Director 8.X, SQL Server, Clear Quest**,** Windows, UNIX, Agile**.**
